Design
a whiteboard: one revision of the workflow

Publish

Published workflow
only a published revision runs

Start

Work order
one execution of the published workflow

Engine
activates the steps whose links are met

Worker runs the work step
synchronous, or asynchronous with polling

links of that status
to the next steps

Work step ends
Complete, Failed or Error

trigger with
Continue monitoring

Clone of the work order
waits for the next event,
the work order goes on

link to a terminal node,
or Failed or Error with no link

Terminal node
the first one reached ends the work order,
which is Complete, Failed or Error

Portlet: a widget of the dashboard,
loaded only in the web process.

Action plugin: the type of a step.
The worker runs its code.
