Step starts
inputs from the workflow, timeout

validate_inputs

false

Error
Invalid inputs: ...

true

execute (in a worker)
returns status, details, outputs or delay

Each call of execute and check_status: timeout without report_progress ends the step (On_timeout, default Failed)

synchronous_execution?
or final status

yes: outputs = returned hash

Step ends
Complete, Failed or Error
outputs stored (+ Step_information)
post-processing, next steps

multiple_execution? true (trigger):
the work order is cloned at the step

no: asynchronous

Persist the plugin object (Marshal)
free the worker

after delay

check_status (in any worker)
returns status, details, delay

yes: outputs = @outputs

no: nil, In Progress, Undefined
persist, wait delay

final status
